

Press Release:

Official History of the Newly Discovered Royal Sea Horse Kingdom

Information concerning a newly discovered Royal Sea Horse Kingdom is coming to light. Since the revelation of this unique kingdom, scholars have been contemplating its impact upon the world's knowledge of the earth's waters.

The first thing under scientific examination by many oceanographers is the glowing green stone that has come into the possession of Miss Ellen Researcher, the daughter of Dr. Ralph Researcher, a prominent oceanographer and certified scuba diver.

Writing in the prestigious *Journal of Undersea Kingdoms*, Dr. Researcher describes the Royal Sea Horse Kingdom as being protected by the glowing green stone that issues warnings of storms and dangerous occurrences to members of the Royal Sea Horse Kingdom. According to Dr. Researcher, the stone is capable of communicating with humans.

Dr. Researcher claims that the glowing green stone, named Richmond Sea Stone (powerful protector), guards the Royal Sea Horse Kingdom.

The stone's ability to send messages to members of the Royal Sea Horse Kingdom cannot be denied and has truly astounded the scientific community. Scientists are baffled as to how this mysterious stone received its power of communication.
